

PRESS RELEASE

FairWind Secures Part of Contract for 443MW Wind Project Installation in the United Kingdom.

FairWind has been selected as one of the installation partners for the Viking Wind Farm project in the Shetland Islands, which will be Vestas' largest onshore wind farm order in Europe to date.

Vejle, January 20, 2023 FairWind commences 2023 with a partial contract for the Viking Wind Farm project in the Shetland Islands and will be responsible for erecting 65 wind turbines at a total of 280 MW. The total project will consist of 103 Vestas V117-4.2 MW turbines that will be erected from February 2023 and is expected to be fully operational in 2024.

"As one of the world's leading suppliers of wind turbine installation, we are proud to have been chosen as the installation partner for the Viking Wind Farm project. This project is a testament to our experience and capabilities in handling large-scale wind farm projects and solidifies our position as a trusted partner in the industry."

- Dan Lund, Chief Sales Officer, FairWind

FairWind will erect 65 turbines at a total of 280 MW in the Viking Wind Farm project in the Shetland Islands.

The Viking Wind Farm is located in the Shetland Islands north of mainland Scotland. When completed in 2024, the Viking Wind Farm will be the UK's largest onshore wind farm in terms of annual electricity output and will play a crucial role in contributing towards the United Kingdom and Scotland's net zero targets.

About FairWind

FairWind A/S is a leading global provider of one-stop solutions for the installation and service of onshore and offshore wind turbines throughout the world. FairWind has worked in more than 40 countries and cooperates with over 1,500 technicians to manage customers' projects globally.
