

PRESS RELEASE

FairWind Awarded installation of 380 MW Pjelax-Böle-Kristinestad Norr Wind Farm

Vejle, February 2, 2023

FairWind has been chosen as installation partner for the 380 MW Pjelax-Böle-Kristinestad Norr Wind Farm cluster in Finland. A total of 56 Nordex-N163 Delta4000 turbines - the latest turbine type N163/6.X of the 6MW class - will be erected from the spring of 2023 and is expected to be fully operational by the end of the year.

With 380 MW, the Pjelax-Böle-Kristinestad Norr project also represents Nordex's largest order received to date in Finland, which is one of the wind industry's fast-growing markets. At FairWind, we are proud to be part of this project and take another important step into the green transition in Scandinavia.
